

Minimal Course Enrollment Policy
College of Pharmacy

The purpose of this policy is to outline the minimal enrollments required for course offerings in the College of Pharmacy and to establish the basis by which exceptions may be granted.

1. Minimal course enrollment for undergraduate/professional courses: 10 students
2. Minimal course enrollment for graduate courses: 6 students

Exceptions may be granted by Department Head on the following basis:

1. Course is of critical importance for on-time graduation of specific students AND no alternative course or plan of study is available that will lead to the same competencies/outcomes
2. Course is experimental and initial offering is intended for low enrollment
3. Course involves a clinical or laboratory experience that necessitates an enrollment below the usual minimal number

Adopted by College Executive Committee March 5, 2010
Re-issued effective July 1, 2010
