What IF We Went Beyond the Disease Model of Addiction?

We welcome to campus, Sally Satel, Psychiatrist, Lecturer at Yale University School of Medicine, the W.
Enterprise Institute

**Description:** What are the limitations of the disease model of addiction and what are its benefits? If we want to call addiction a disease, then we must ask what kind of a disease is it. Unless we challenge a medicalized vision of addiction, I argue, we will be hampered in understanding the roots of the opioid crisis and the implementation of remedies.

**Date / Time:** Tuesday, October 29, 2019 - 6:30pm  
**Location:** Fowler Stewart Center
